

15.310m from beam to stage floor

7.210m from beam to underside of Proscenium Arch

8.100m from under side of Arch to Stage floor`

Notes

A complete restoration of the Dome has taken place, leading back to the original 1908 appearance but with significant upgrades. However it is still extremely valuable heritage fabric and therefore can not be included in any technical specifications!

A Safe Working Load of 2000kg appeals to all rigging points
